Title: **Application Form for Inclusion of Large Aircraft
in the Pilots Licence**

Page 1 of 4

S/N	SECTION 1: PRELIMINARY INFORMATION:		
1.	Name of Applicant:	Test Date (s):	
2.	Address of Applicant:		
3.	Duration of the test: _____hours _____min		
4.	Type of Licence held:	License Number:	
5.	Aircraft Registration:	Aircraft Type:	
6.	Location/ Aerodrome:		
7.	Name of Employer:		
8.	Type Ratings Already Held:		
9.	Name of Examiner: (in Block Capitals)	Type of Licence	Number of licenses:
10.	Examiner Authorization number:		

SECTION 2: CERTIFICATION FOR PART I: RATING ON A PROFESSIONAL PILOT'S LICENCE

		Date of Test	A/C Reg	Name and signature of Examiner	License No.
2.1	By Day				
I.	Normal take-off and climb to clean configuration.				
II.	Visual circuit, approach without visual or radio glide-slope guidance, and full stop landing.				
	RESULT			PASS	FAIL
2.2	By Day or Night				
I.	Accelerate stop with simulated engine failure before V ₁ followed by abandoned take-off drills.				
II.	Take-off and landing with crosswind component in excess of 10 knots.

III.	In approach configuration, approach to stall (to stall warning) and recovery.				
RESULT				PASS	FAIL
2.3	Engine-Out procedures				
I.	Take-off with simulated failure of one engine between V ₁ and V ₂ .				
II.	With one engine simulated failure, climb to clean configuration.				
III.	With one engine simulated failure, do ILS approach followed by Go-around solely by reference to Instruments.				
IV.	With one engine simulated failure, make an approach and a full stop landing.				
RESULT				PASS	FAIL
2.4	By Night				
I.	Take-off with a simulated failure of one engine between V ₁ and V ₂ .				
II.	Visual circuit with one engine simulated failure.				
III.	Visual approach and landing with one engine simulated failure.				
RESULT				PASS	FAIL

SECTION 3 CERTIFICATION FOR PART 2 RATING ON A PROFESSIONAL PILOT'S LICENCE

		Date of Test	A/C Reg	Name and signature of Examiner	License No.
3.1	By Day				
I.	Normal take-off and climb to clean configuration.				
II.	Visual circuit, approach without visual or radio glide-slope guidance, and full stop landing				
RESULT				PASS	FAIL
3.2	By Day or Night				
I.	Accelerate stop with simulated engine failure before V followed by aborted take-off drills.				
II.	In approach configuration, approach to stall (to stall warning) and recovery.				
RESULT				PASS	FAIL
3.3	Engine-Out procedures				
I.	Take-off with simulated failure of one engine between V ₁ and V ₂ .				
II.	With one engine simulated failure, make an approach and full stop landing.				
III.	With one engine simulated failure, climb to clean configuration.				
IV.	With one engine simulated failure, approach, and full stop landing.				
RESULT				PASS	FAIL
3.4	By Night				
	Normal take-off, visual circuit, approach and full stop landing.				
RESULT				PASS	FAIL
